Narrative	
Include: Investigation Notes, Evidence, Property Missing, Property Found, Damage, Pending Actions, Administrative Actions, Follow-up.	<p>On December 16, 2013 the Transamerica Pyramid received a letter in an envelope with an indistinct address and greasy exterior, sloppy writing and a likely fake return address name. (Joe Bagman.) For this reason, the envelope was treated as suspicious and passed to the Director of Security, Jackson Talbot.</p> <p>Talbot called the Security Manager, Ellis and they opened the letter together.</p> <p>Talbot and Ellis examined the letter extensively before opening. Inside the letter there was a vague "warning" about something catastrophic happening to various locations, including the Transamerica Pyramid.</p> <p>There was no visible chemical, powder or device in the envelope.</p>

	<p>To the Mayor of San Francisco and the Chief Operations Manager at the Transamerica Tower in S.F. also:</p> <p>You two are the only ones who will have this letter and you should never it show it to anybody else should you cause national panic and a civil uprising that could cost more lives than we are trying to protect by sending you this letter.</p> <p>For a 99 percent fact, we can guarantee that a 911 catastrophe in heading toward your city and that building especially. It's in too many codes, movies, architecture, to be a coincidence, and we are trained to look for these things. They may be other targets like the Coit Tower, so apply all your skills to your whole city.</p> <p>Do whatever you guys have to do to prevent the loss of lives, and we'll continue to do the same.</p> <p>God bless you and your city.</p>
